

## GET IN TECH

Orthokey is a company founded in 2005 in Florence by people with 30 years of experience in **Digital Surgery**.

Our products for over 15 years on the market cover all the main applications for surgery of the lower limbs with a wide range of solutions for various needs: **from smart tools to robotic systems**.

In the design phases of our solutions, at Orthokey, we pursue three simple but fundamental objectives: our systems must be fast, simple and accurate. This ensures high-level solutions with short learning curves and surgeon satisfaction.

For more information please contact us:  
[customer.service@orthokey.eu](mailto:customer.service@orthokey.eu)  
[www.orthokey.com](http://www.orthokey.com)

Our solutions are **open platforms**, to support the surgeon in working with any implant.

Our philosophy is to give freedom of choice on the state of the art of technology, combined with the freedom of choice of the best partners in orthopedics.

With real added value and smart solutions.
